

HYDR-STAR

HYDR-STAR design and manufacture high quality air driven liquid pumps and gas boosters, boasting a wider range of pressure ratios than many other manufacturers with options to suit most applications. HYDR-STAR offers a wide range of high pressure fittings, valves and tubing. The pump range includes a selection of manual pumps and electric piston pumps.

Boss Hydraulics

Whether you need Hydraulic Pumps, Cylinders, Bolting or Mechanical Tools from the BOSS BLUE range (350 bar+), or AC & DC power packs, AG cylinders or Mobile valves from the BOSS BLACK range (under 350 bar), BOSS Hydraulics have a product that will suit your requirements.

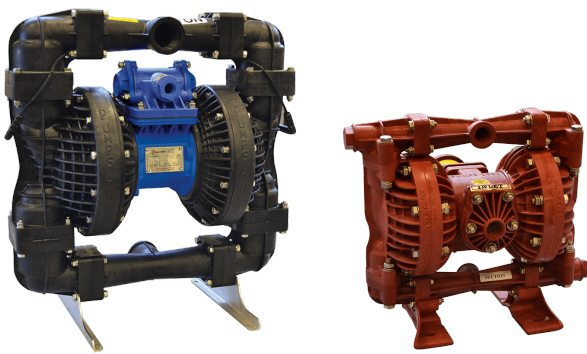

Chicago Pneumatic

Chicago Pneumatic offers an extensive range of bolting solutions, nut runners, cordless tooling, fastening, grinding tooling, air compressors and much more. The brand is dedicated to providing the maximum value for money with great accessibility and product support.

Pumps 2000

A wide range of patented, non-metallic Pneumatic Diaphragm pumps that are made of engineered plastics, operate lubrication free and are light weight and manual handling friendly. Designed specifically to handle abrasive, solid-laden and corrosive fluids.

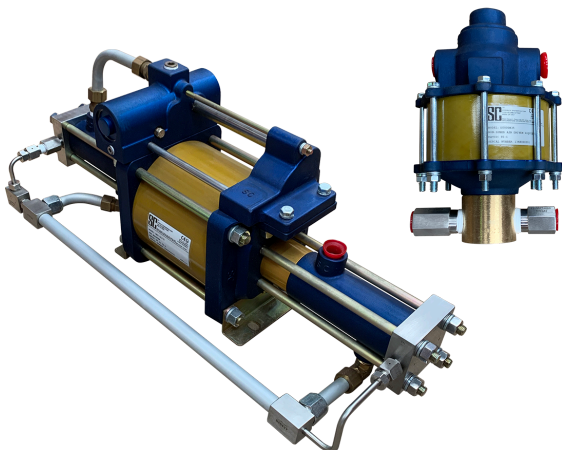

Sprague

Sprague offers a variety of air driven pumps, each with specific pressure ranges and design configurations to meet the demands of the high-pressure pump market.

SC Hydraulic Engineering

SC Hydraulic Engineering manufacture and design a range of high pressure, air driven liquid pumps, as well as air and gas boosters which are used in a variety of industries and applications.

TTI

A range of Power Breathers™ that protect lubricants and equipment from moisture and particulate intrusion. Extends service cycles and equipment life resulting in lower lifetime operating costs.
